Summary

Full-stack engineer & CTO specializing in building production ready apps, scalable platforms, and AI-powered products. I've architected and shipped entire systems end-to-end including **Carilya**, a mobility startup that secured **€200k+ in investment**. I handle everything from product ideation to deployment: web, mobile, backend, AI integrations, cloud, and DevOps. Companies work with me when they need someone who can **own the whole technical side**, move fast, and deliver polished results without hand-holding. Open to short-term projects, long-term contracts, and technical leadership roles.

Experience

Carilya | Tangier, Morocco

CTO and Co-Founder | 02/2025

- Leading end-to-end development of Carilya, a B2B2C car-rental and mobility platform from prototype to funded, operational product.
- Architecting and maintaining the full tech stack (Next.js, Prisma, PostgreSQL, tRPC, cloud infrastructure) to support scale, reliability, and rapid iteration.
- Growing and guiding a small engineering team; enforcing clean architecture, CI/CD pipelines, and coding standards that consistently reduce release time by 40%.
- Supporting ongoing fundraising initiatives after securing **200K MAD** in seed investment through strong technical execution and product validation.
- Designing internal tools and analytics dashboards that improve fleet utilization, reduce operational friction, and increase rental turnaround efficiency.
- Driving the long-term product roadmap and aligning engineering priorities with business objectives, investor expectations, and user needs.

Nexus Marketing | Tangier

Full Stack Developer | 04/2025 - 10/2025

- Rebuilt web pages using **Vue 3**, TailwindCSS, and Composition API.
- Developed backend services and integrated third-party APIs to serve dynamic content efficiently.
- Automated repetitive frontend tasks via custom extensions and build tools.
- Conducted performance audits and optimized frontend bundles for speed.

HIFIVE GROUP | Tangier

Senior Full Stack Developer | 05/2023 - 04/2025

- Built CRM features and landing pages using **Vue (2 & 3)** with Laravel, focusing on scalability and responsiveness.
- Created real-time data dashboards with Vue and WebSocket APIs.
- Led frontend refactoring initiative to migrate legacy Vue components to Vue 3.

Freelancer

Software Developer | 06/2020 - 04/2023

- Delivered custom Vue-based dashboards, SPAs, and admin panels for clients in e-commerce and services.
- Integrated secure login systems and RESTful APIs with frontend state management.
- Balanced multiple projects while maintaining clean architecture and high test coverage.

Skills

TypeScript, Laravel, JavaScript, ReactJS, NextJS, HTML, PHP, CSS, TailwindCSS, Vue, Angular

Projects

SUPMIR | Casablanca

Bachelor in Web Development & DevOps | 08/2025

ISMONTIC | Tangier

Diploma in Web Development | 07/2023
